About new TIS system

Trader-Invest System

TIS is a new system of investment at the currency market which gives maximum of opportunities for business, enhancement of the capital, using the most attractive tactics and strategy in various variations. In TIS there are no restrictions in positioning on Forex market.

What does TIS offer?

- 1) You become a trader and receive money not only from trade, but also from investments into you, as in the trader.
- 2) You become an investor, that is invest the money in traders, according to the chosen program of investment, and gain income without implementation of personal trade and without time expenses
- 3) You can at the same time become the investor and the trader, thus you have an opportunity to conduct commercial transactions independently, to invest money not only in traders, but also in yourself.

Why TIS from FOREXstart is favorable?

Our investor makes investments in unlimited number of traders at own choice, according to the chosen strategy, investments increase in proportion to contribution. The profit depends only on percent of a gain of the capital of the trader in a period from put in of investment till its put out.

Our trader does business on his account and in addition draws interest from profit of the investors, the interest rate is defined independently. There is a possibility of earnings on investments not only for top traders, but also in general if strategy of the investor assumes involvement of not the most successful traders at the moments of their take-off.

How to join us?

Visit our website – www.forexstart.org Click Open the Trading account. Further, you should deposit your account. The minimum size of the deposit for the trader is \$100, for the investor - \$1.

Congratulations, now you are a part of our team!

You can also become an operating trader (it is possible to invest in you), and the investor (you can earn without trade), and successfully to combine both kinds of activity.

If you already trade with FOREXstart and want to become the investor, simply open the section "Investments" in the Private office and in the Rating of Traders list choose those who attracts you from investment point of view.

Within TIS program we offer two types of investments:

- ▶ Direct investments – the sum of investment is charged off your account and enlisted into the special account attached to the account of the chosen trader, thus your contribution grows in proportion to the account of your trader (you can read in more detail about direct investments on our site)
- ▶ Copying of transactions – you reopen the transactions of the chosen trader on your account, transactions can be reopened on a ratio of lots, and on a ratio of means (you can read more with the investment by copying of transactions on our site).

If you want to become the operating trader, in the section "Investments" of the Private office please open Become the Trader tab. Choose type of the account (real or demo), fill information form in the form of the table and start your work.

FOREXstart gives a perfect opportunity to become an operating trader not only the one who invested \$100 and more, but also a good chance to the participants of the investment program who passed the first two stages. Thus you do not invest your own money.
